

# Full installation of Debian 11.7 with full LAMP Stack & PHPMyAdmin

This is a step by step instruction on how to install the infamous LAMP-stack (Linux Apache MariaDB PHP) on Debian 11.7.

## Part 1 - Install Debian on VM (or wherever you like)

- Follow the step-by-step guide [debian-11.7-installation.md](#)

## Part 2 - Install LAMP Services (+ PHPMyAdmin)

- Follow the LAMP-installation guide [debian-lamp-installation.md](#)

## Part 3 - Get Juicy

- Become a master of SSH by going through the [openssh-configuration.md](#)
